

Questions

- How can we test the text message/emails features?
- Is there a place for people to apply who aren't doctors?
- Has the back log been corrected as well?
- What is a peer ID?
- When you make an appointment does the appointment immediately appear under schedule or does the admin or doc need to accept the appointment if so does the back log reflect?
- Will appointments be sent out via email and text?

Issues/Defects

- When the screen splits the words overlap on the welcome page
- Change the logo font back
- The video doesn't have connectivity for more than 20 seconds
- When marketers call the doctor the doctor cannot see the marketer (Video defect)
- I'm having issues with scrolling down through the patient list

Changes

- The patient shouldn't be able to call the doctor

Marketers portal

- The word **Patient** needs to be changed to **client**
- **See a therapist** needs to be changed to **Connect client to a therapist**
- Delete telehealth therapy
- **Assign a doctor** the option to upload a picture needs to be deleted and our intake form need to be added.

Doctor's portal

- **(Schedule tab)** Doctors must have the ability to move their own schedule around. Doctors need to have the ability to close or open availability. The Schedule tab needs to be more detailed as far as scheduling

Additions/Add-ons

- On the **welcome page** a 4th tab should be added named (licensed professional counselor) LPC
- It should mirror the doctors tab w/ My Profile, Overview, Patients, schedule, & chats
- **Overview** should include today's consults, clients this month, and tentative appointments the graph should stay the same as well.
- **Schedule** can stay the same but doctors will need to the ability to change a create availability.
- When people Register it should read "Register as a Doctor, Register as a Patient, or Register as a LPC" depending on the tab that they choose.

- **Marketing portal** under – intake form should be added and the space to insert **Medicaid information**
- **Patient Portal** under *see a therapist* after they put the time and the date in there is no way for them to save it. There needs to be a button added that reads (request, confirm, save) That appointment should either be confirmed by the doctor or LPC.
